

## **Willowbrook Questions Form**

On November 29, 2018, officials from the U.S. EPA will host a meeting to talk about the agency's work to better understand airborne releases of ethylene oxide from the Sterigenics facility in Willowbrook, IL.

Due to the number of expected attendees, we are working with the community to identify key questions ahead of time to design the agenda and be responsive to community concerns.

Do you have questions you would like to have addressed as part of the presentations?

Submit them here, and we'll get them to U.S. EPA in advance of the meeting. Please submit questions for the meeting by Monday, November 26.

You also can submit questions directly to EPA by email at [EtO@epa.gov](mailto:EtO@epa.gov)
