Subject: Snow Removal & Plowing - ComEd Critical Equipment must be clear of snow

Dear Customer:

ComEd is planning for the winter months. As part of that preparation, we would like to bring the following to your attention:

- Any ComEd transformers and/or switchgear on your property may need to be accessed in the winter. We understand that occasionally after a snowstorm, snow removal efforts will result in buried or blocked access to critical ComEd equipment. A snowplow may move snow onto our equipment, which may lead to damage to the equipment and a possible loss in power.
- If there is a need to access the equipment, ComEd will require at least ten feet of open space in front of the equipment's cabinet doors. Additionally, at least one (1) foot of clearance on the remaining three (3) sides of the equipment is necessary.
- To the extent there is ComEd equipment along plow routes or in parking lots, please remind snow removal teams to avoid piling snow on or around ComEd equipment. Piling snow on or around ComEd equipment may cause damage and result in a loss in power. Restoration of power may also be delayed due to ComEd's inability to gain access. If power is lost, call 1-800-EDISON-1 to start the restoration process.

Thank you for your cooperation and support. If you have any questions or concerns, please contact me.

Sincerely yours,

*Adriana Carrasquillo*
